Sub: Preparedness for deficient South-West Monsoon 2015

Madam/Sir,

This is in reference to the Office Memorandum dated 22nd May 2015 from Director (OM), Ministry of Power regarding south-west monsoon forecasts by the Indian Meteorological Department (IMD). It has been informed that the issues of deficiencies in rainfall during the year 2015-16 were discussed with IMD, and it has been informed by IMD that on the basis of the first forecast there is indication of below normal rainfall over Uttar Pradesh, East Rajasthan, Madhya Pradesh, Gujarat, Maharashtra, interior Karnataka, Telangana and Andhra Pradesh.

In case of the likely deficient south-west monsoon as forecasted by IMD, the following measures are suggested to meet the situation, which may be experienced in the All India electricity grid.

1. Conservation of water from Hydro stations
2. Stocking of coal in thermal power stations
3. Procurement of fuels in advance (such as coal, gas, Naptha etc..)
4. Ensuring maximum thermal generating station availability.
5. Rescheduling or deferment of maintenance schedules of power plants wherever possible
6. Rescheduling or deferment major power system elements outages wherever possible
7. Procurement of power, utilizing the gas / Naphtha based stations, availing un-requisitioned surplus.
8. Maintaining the load generation balance and advance planning of load shedding measures, if required.

It is requested that the operating personal of all the SLDCs and RLDCs may be advised to remain in a state of high alert and to take care of contingencies in the system.

Kindly acknowledge receipt of this communication and indicate the specific steps taken in your respective state /region to overcome the situation.

Thanking you,

Yours faithfully,

(V.K Agrawal)

ED, NLDC
